

## Tomato Trials

A.E. Nightingale, Ph.D.  
Professor Emeritus  
Horticulture Sciences  
Texas A&M University

**Date:** 1989

**Location:** John Stahman Farm – Waller, Texas

**Variety:** Celebrity

Plants that received one application of Spray-N-Grow showed increased yield in the form of increased weight (11.5%) and number of fruit (6.4%). Plants that received two applications produced 82.2% more fruit with a total weight increase of 65.6% over the control plants.

### **LBS OVER CONTROL**

#### **1 Application**

+10-1/4 lbs = 11.5%

#### **2 Applications**

+58-1/4 lbs = 65.6%
